- Reading
- Travelling
- Badminton

PROFESSIONAL SUMMARY

Full Stack Developer with experience in designing robust, scalable web applications. Proven expertise in Python, Django,and SQL,HTML/CSS,JavaScript,React.js

WORK EXPERIENCE

IntelliSync.in - Software Deveoper March 2024 - Present

Lyceum Infotech Private Limited - FullStack Developer August 21 -March 24

PROJECTS

Visitors Management System

Tech - Python,Django,HTML,CSS,JavaScript and SQL
Implemented features such as OTP-based authentication, purpose-driven workflows, dynamic form population, and automated email notifications
Its included multi-level verification processe such as security & employee/supervisor approvals
The system simplifies day-to-day detailed visitor logs for enhanced traceability and security compliance .
Pre-approval Vip with approval pass and golden pass auto-generated and send the notification on gate for pre-approved vip guest.

Vendors Management System

Tech - Django, HTML, CSS, JavaScript, and SQL
Developed a platform allowing vendors to register, update compliance documents, and maintain communication details for efficient management
Features like Purchase Order Management: Streamlined draft and final PO creation, facilitating transparent discussions, technical reviews, and approvals before finalization.
Implemented a secure bidding process with rank visibility and iterative price updates, ensuring competitive and fair evaluations.
Inventory Management: Developed a fabric library and surplus management system to track leftover materials, optimize storage, and reduce waste.
